From the Ohio Statesman. An Answer To "Do They Miss Me." BY MARY.

Yes we miss thee at home, yes we miss thee, Far more than we ever can tell, And our sad hearts are constantly dwelling On thee and thy mournful farewell-No more doth thy pleasant voice greet us, No morethy dear form can we see: And thy laughter so wild and so mirthful We miss in our moments of glee.

Yes we miss the at all times; but mostly, When evening's grey mantle is spread, When nature is calmly reposing:
And we bury all care with the dead— When round the bright hearth stone we gath Each heart with its fountain of joy, Your absence, these dreams to destroy.

Oh! we miss thee, when wandering at twilight, Neath the blue arch of Heaven, above, When the pale moon her holy watch keeping. Is beaming so softly in love-As upward we gaze at the azure,

Deep, deep is the sigh that will swell, Gush forth from the heart's hidden well. Then tarry no longer, dear loved one,

Nor linger away from thy home, Where liearts for thee ever are sighing, And wishing you back as you roun-Oh! come, a fond we!come we'll give you Each kind heart the wanderer wilt bless, For we miss the at home, oh we miss thee, More deeply than tengue can express.

Your business is suffering, and my patients are dying, and yet eyes, "are you drunk or crazy?" here we are, dancing attendance on the cursed Legislature: Why don't they-Camden! or Long-a-Coming! and let us go

The Captain drew his young friend into the recess of a corridor, and looked at him queerly, with one eye half shut, and his mouth fixed on a decided pucker.

"The fact is, R.', said he, "you are green. Are you not aware that this is a great country, that New Jersey is a great State, a New Jersey Legislature the tallest kind out of jail?" The Doctor confessed that he was aware of some of these points, straightway, and would not take a fee; the fact is, grave as he was, he was dying to butderk as to others; he had some conception of how the Ichtanosaurus, -a big animal, with a hard name, known to geologists, which had the whole world to itself, a few millions of years before Adam,how the Ichthyosaurus looked, when he was about, but Jersey Legislation was an animal which he had looked at on all sides, but could not understand. Whereupon the Captain took the Doctor good-humor edly by the arm, and led him into a retired place, where a lighted candle shone upon the honest countenance of a bottle of real champagne-made in Neware, but labeled France.

Over this bottle the Captain proceeded to give the Doctor an idea of Jersey legislation. If you could have seen the fine Roman features of the Doctor, and the good humored face of the Captain, a little ly gray, you would have much enjoyed the startling narrative which fell from his
